-

Personal Profile

Full Stack developer with more than 8 years of experience in JavaScript and PHP. I have strong analytical skills and take great care in communicating with clients to find the right solution for their needs.

I value openness and transparency a great deal so that I can understand why decisions are made in a certain way and can voice any doubts early on. My core competency lies in complete end-end management of a new website development project, and I am seeking opportunities to build websites and mobile apps from the ground up for you or your business

Work Experience

FULL STACK DEVELOPER

Self-Employed
Feb 2021 - present

FULL STACK DEVELOPER

Seavus
May 2019 - Jul 2021
